The Big Picture

What the quest asks of you

Founding Farmers is a story quest made of 18 chapters in three acts. Each chapter pays out 10 Shards, 180 in total, and anyone who ends up among the first 1,000 finishers also earns a free mint spot plus 500 Shards.

Three limits shape every run: how much energy you have, how much Gold you can raise, and how long crops take to grow.

Act	Chapters	Setting	What holds the door shut
I: The Mark	1-7	Town, river, Whisperwood	Crop tasks 1-7 must be done before chapter 8
II: The Delves	8-14	Stonepeak and its mines	Crop tasks 8-14 must be done before chapter 15
III: The Lake Remembers	15-18	Moonmere	Crop tasks 15-17 must be done before chapter 18

■ **Energy:** Act I is almost free. Act II is where mining eats roughly 70-110 energy.

■ **Gold:** the whole story needs about 20,000, and every coin goes to Bram (15,000 in chapter 11, 5,000 in chapter 16).

■ **Time:** Star Fruit needs Farming level 10 and then 5 hours of growth. It is the last thing between you and the ending.

All figures were taken from the game's client code on 3 Oct 2026. The game is in beta, so confirm anything critical in play.

Quick-Start Route

The whole quest in twelve moves

- 1. Fish from the first minute.** Casting costs 1 energy and every fish pays back more. While you do it, you are also hunting the Golden Fish for chapter 15 (about 1 cast in 33, town river or home island only). Never fry it or sell it.
- 2. Fry the common fish.** They are your fuel for the entire quest.
- 3. Plant early.** Only harvesting gives Farming XP, so get crops in the ground as soon as the seeds are open to you.
- 4. Clear chapters 1-7.** Mostly walking, reading and two puzzles. Chapter 6 only works after 9 PM game time.
- 5. Finish crop tasks 1-7 and reach Farming 5** before touching chapter 8. Grow about 5 extra Cabbage to close the small XP gap.
- 6. Stonepeak, first stop:** open the shift boss's chest in the Old Working for a Bronze pickaxe and 6 Copper Ore, then mine copper. You need 29 more in total: 14 for Dunn and 15 for Bram.
- 7. Buy the 25 Stone for Dunn** at the General Store instead of mining it.
- 8. Green Vein:** the prospector's chest gives a Gold pickaxe and 2 Emeralds. Break 3 emerald seams, take Haskett's Note.
- 9. Raise the 15,000 Gold for Bram** by selling loot, then fish, then crops. Mining for Gold comes last.
- 10. The Gloom:** fit the lever handle, mine 2 Rubies while you are there, and loot the red-deep chest.
- 11. Sunken Vault:** grab the Amethyst rod and Amethyst pickaxe, and mine 1 Gold Ore for later.
- 12. Act III:** plant the bean and eggplant tasks the moment chapter 15 opens, sow Star Fruit as soon as you reach Farming 10, and do your Ghost Catfish fishing after dark.

Energy Cheat Sheet

Earning it, spending it, never wasting it

Your bar holds 100 energy (150 for Founding Farmer NFT holders) and nothing refills it by itself. Everything below is about topping it up cheaply.

What things cost

Activity	Energy
Sow one seed	1
Harvest one crop	1 (so 2 per crop in total)
Chop with an axe, cast a line, swing the bug net	1 each
Each blow on ore or crystal	2, whatever pickaxe you hold
Combat swings	1 for every 3 hits that connect
Walking, talking, reading, puzzles, chests, hoeing, watering, cooking	Free

Where energy comes from

- **Your bed:** one hour in it restores a full bar. It works once per 12 hours (6 for holders), counted from the moment you lie down. It also heals you completely whenever you like, cooldown or not.
- **Cooked food:** restores its listed amount with no daily cap, but never beyond a full bar. Raw ingredients restore nothing, and the stoves cost nothing to use.

Dish	Made from	Energy	Health
Hearty Stew	1 fish, 1 Potato, 1 Onion	22	+44
Fried Fish	1 fish	5	+10
Bread	2 Wheat	4	+8
Vegetable Plate	any 2 crops	2	+4

Shop-bought dishes work out to roughly 900 Gold per energy point, so never buy them.

The fish-and-fry loop

Fishing is the strongest energy engine in the game. A cast is 1 energy, any bite gives a fish, and a fried fish returns 5. If even 1 cast in 5 lands, you gain energy.

1. Cast from the town river bank until you hit 0.
2. Cook the catch at the Bakery (left of the square) or at Marlow's old house, one fish per dish.
3. Eat only what you need, and keep the extras in your backpack.
4. Keep every Golden Fish and Ghost Catfish out of the pan.

Winning the needle minigame

- Each bite gives you 4.5 seconds, enough for roughly 3-5 passes of the needle.
- The needle races through the centre of the bar and crawls near the two ends, so aim for a green zone near an end.
- Study one pass before committing, then press a hair early to cover your reaction time.

- A wider green band is the real fix. Rods get easier in this order: Iron, Bronze, Gold, Amethyst.

Small habits, big savings

- Reach the bed almost empty so its refill is not wasted, and lie down the second the cooldown ends.
- Do not eat with a full bar; it only heals you.
- Fried Fish are eaten with a click on the ground while selected. Store the stack in the backpack and drag the whole stack to the hotbar only when needed, because stacks cannot be split.

Mining Cheat Sheet

Singles, doubles and what each rock costs

A **double** rock is a large rock with a small one fused to it, or a wide or tall crystal. It needs one extra blow and yields 2 ore, so each ore is cheaper. Better pickaxes do not cut the per-blow cost; they only unlock tougher ore.

Ore	Pickaxe needed	One ore (single)	Two ore (double)	Per ore, single / double	Respawn
Copper, Quartz, Rose Quartz	Any	6	8	6 / 4	20-25 min
Topaz, Sapphire, Moonstone	Bronze or better	8	10	8 / 5	40-45 min
Emerald, Amethyst, Ruby	Gold or better	10	12	10 / 6	60-75 min
Gold Ore, Diamond	Amethyst	12	14	12 / 7	90-120 min
Grey rock (Stone)	Any	3 for 2 Stone	-	1.5 each	10 min

Which to break

- Need a quantity of ore (copper for Dunn and Bram, 5 Gold Ore, 2 Rubies)? Break doubles first. Singles only when no doubles remain, or after the doubles respawn.
- Need a number of rocks (chapter 10: 3 emerald seams)? Break singles. A double counts as one rock but costs 2 extra energy.
- Not sure which kind you hit? If a rock outlasts the blow that would finish a single, it is a double; keep swinging.
- Stone: buy it at the General Store (about 35 Gold each) if you have the Gold, otherwise mine grey rocks.

Farming Plan

Crop tasks, levels and Shards

Every chapter except the last has a crop task. Since the 4 Oct 2026 update a task only counts the exact crop it names, and every crop yields a single harvest before you have to replant. A harvest counts toward every open task that names that crop, so one Wheat harvest can satisfy both Wheat tasks.

Seeds: Hazel's Seed and Tool shop, east of the square, sells most of them. Marigold and Sunflower seeds are at Juniper's Apothecary. Plant at the three fields beside the glass greenhouse (124 squares) or on your home island (20 squares; take the boat at the bottom of town). Crops never spoil, so ripe ones can wait.

The task list

Ch	Crop	Amount	Seed level	Finish before
1	Parsnip	6	1	Ch 8
2	Spring Onion	6	2	Ch 8
3	Wheat	6	2	Ch 8
4	Potato	6	3	Ch 8
5	Cabbage	6	3	Ch 8
6	Onion	8	4	Ch 8
7	Wheat	8	2	Ch 8
8	Rice	8	5	Ch 15
9	Broccoli	6	5	Ch 15
10	Marigold	6	5	Ch 15
11	Corn	6	6	Ch 15
12	Sunflower	6	6	Ch 15
13	Tomato	6	7	Ch 15
14	Cucumber	8	7	Ch 15
15	Green Beans	10	8	Ch 18
16	Adzuki Bean	10	8	Ch 18
17	Eggplant	10	9	Ch 18

XP milestones

Farming XP comes only from harvesting. Totals needed: level 5 = 557, 6 = 851, 7 = 1,204, 8 = 1,613, 9 = 2,079, 10 = 2,601. The 17 tasks add up to about 2,600 XP, so doing them in order lands you at level 10 almost exactly. The one weak spot is before Rice, where Act I leaves you 60-85 XP short of level 5.

Order of play

- 1. Before Act II:** top up to level 5 with roughly 5 spare Cabbage (17 XP each).
- 2. Act II:** Rice, Broccoli and Marigold first (past level 6), then Corn and Sunflower (past level 7), then Tomato and Cucumber (you finish near level 8).

3. **Act III:** Green Beans and Adzuki Beans the moment chapter 15 unlocks (45-50 minutes each, past level 9), then Eggplant (60 minutes each, level 10 with about 10 XP spare).
4. **Marven's crops** (5 Wheat, 5 Cabbage, 5 Corn) are grown alongside and add about 290 XP as insurance. Extra Sunflowers give 24 XP each if you are still short.
5. **Star Fruit:** sow it right when you hit level 10. It takes 5 hours: the timer reaches 4, then a second watering is required before the last hour.

Crops that lose money

These now sell below their seed price, so grow only the amount a task or Marven requires.

Crop	Seed	Sells	Result per crop
Corn, Cucumber	~615	~490	-125
Tomato, Adzuki Bean	~680	~545	-135
Green Beans	~755	~605	-150
Eggplant	~925	~740	-185

In total these tasks cost about 7,900 Gold more in seeds than the harvests earn back. Wheat, Cabbage, Marigold, Rice, Broccoli and Sunflower are the profitable ones, selling for about double their seed.

A shovel (15,000 Gold at Hazel's) now exists. It clears a planted square for free, but you lose the crop, and the story never requires it.

Shards from crops

Harvesting a rare crop has a 1-in-8 chance to drop 1-2 Shards. That beats fishing (1 in 20 per fish) and ore, trees and foraging (1 in 25). A daily cap of 30 Shards on lucky drops resets at 00:00 UTC.

- A crop is rare if its seeds unlock at Farming 10 or higher; Saffron and Star Fruit also count.
- The drop rate is the same for all rare crops, so choose a cheap one that still profits. Sweet Potato (level 10, 70 min, seed ~435, sells ~870) is the best pick.
- Hitting the cap takes about 180 rare harvests, roughly 360 energy. Fish-and-fry covers that.
- Crops over 60 minutes need a second watering; rain does it for outdoor fields.
- Mining for Shards is a poor deal: 1 in 25 odds and 2 energy per blow.

Rare crop	Level	Grows	Seed	Sells	Result
Sweet Potato	10	70 min	~435	~870	+435
Cauliflower	12	90 min	~575	~1,150	+575
Cantaloupe	13	100 min	~625	~1,250	+625
Hot or Bell Pepper	10	60 min	~925	~740	-185
Strawberry	11	80 min	~1,250	~990	-260
Blueberry	12	90 min	~1,450	~1,150	-300

Gold Cheat Sheet

Raising 20,000 without grinding ore

The General Store buys everything at the same prices as other shops, so it is the only seller you need.

Cheapest source first

1. **Spare loot (no energy):** extra Emeralds, Quartz, the 3 Topaz from the Topaz Drift tool box, leftover crops.
2. **Fishing (1 energy per cast):** an average common fish is about 100 Gold. Carp ~53, Chub ~59, Sunfish ~66, Perch ~81, Pike ~150, Tiger Trout ~210.
3. **Crops (2 energy each):** Rice and Broccoli (+~175 each), Marigold and Cabbage (+~120), Wheat (+~90).
4. **Mining (last resort):** copper earns only about 13-20 Gold per energy; fishing or Rice pays several times that.

Story rewards through chapter 10 give about 3,650 Gold, so most of Bram's 15,000 still has to come from selling.

Sell prices (approximate)

Item	Gold	Item	Gold
Diamond	~2,300	Wheat	~185
Gold Ore	~1,050-1,170	Onion	~150
Golden Fish	~905 (do not sell)	Potato	~105
Ruby	~590	Copper Ore, Quartz	~80
Corn	~490	Carrot	~40
Emerald, Amethyst	~475	Stone	~14
Rice, Broccoli	~355	Cabbage	~240
Topaz	~210	Tiger Trout	~210

Never sell these

- Golden Fish (ch 15) and Ghost Catfish (ch 18)
- 5 Wheat, 5 Cabbage, 5 Corn, 2 Rubies and 2 Silvercap Mushrooms for chapter 18
- The Star Fruit seeds from chapter 4
- Every quest item: notes, records, map pieces, the seal, the pearl
- Bram's materials until he has collected them: 3 Emeralds and 15 Copper (ch 11), 5 Gold Ore (ch 16)

Avoid the Sell All button; it will also sell things the story needs. Safe to sell once you have spares: the Diamond, extra Emeralds and Gold Ore, Amethyst, Quartz, Rice and any other crop.

Chapter Checklists

Act I: The Mark (chapters 1-7)

Directions: up is the top of your screen (north), left is west. Detour around walls but keep heading the same way. Press M for the area map.

1. A Strange Find

0 energy

- Talk to Maren (west bank of the river, north of the bridge).
- Find the grey plank in the grass at the water's edge just below her house: Marked Driftwood.
- Show her the mark; she sends you to Wren.

Tip: it is easy to miss in the grass. Walk the shoreline and watch for the E prompt.

2. The Fisherman's Memory

about 3-10 energy

- Go south along the east bank to Wren's cottage by the south jetties.
- Catch 1 Chub, 1 Perch and 1 Sunfish in the town river. Hold Space to wind up, release to cast, tap Space in the green when something bites.
- Return with the 3 fish and the driftwood for Tobin's Trail Log and 150 Gold.

Tip: each cast brings a random common fish. Sell or fry the surplus. If you are out of energy, sleep or cook a Vegetable Plate.

3. The Trailhead

0 energy

- Walk west over the bridge and past the Bakery into Whisperwood.
- Read the old post with the birdhouse by the lodge (not the lodge itself).
- Follow the main path west, across the stream and the crossroads, to the campfire at the end. Open the chest: Hunter's Journal.

Tip: the chest stays shut until the post has been read.

4. The Moonstone Circle

0 energy

- Read the Trail Log (stones 1-3) and the Journal (stones 4-6): hold the book and press Space.
- Go north from the crossroads to the circle, west of Mirror Pond. Layout: top row boar, heron, fox; bottom row hare, stag, owl.
- Touch the stones in the order your own riddles give, then search the middle crystal: Old Token, 2 Star Fruit seeds, 250 Gold.

If the riddle describes...	Touch
a grey bird fishing the shallows on one leg	Heron

If the riddle describes...	Touch
a red thief with a white-tipped tail in the henhouse	Fox
a head-turning hunter that asks "who?" in the dark	Owl
a glade king with a crown of bone and branching head	Stag
a long-eared runner that sleeps in a scrape	Hare
a tusked, bristly digger that roots for acorns	Boar

Tip: the order is random per player, and a wrong touch sleeps the stones for 10 minutes. Write all six down first. Keep the Star Fruit seeds in your home chest; the hollow gives 2 more if you lose them.

5. Clear Eyes

0 energy

- Find the cut stump in Mushroom Hollow (far west of the wood, where the trees go teal), then ask Juniper at the teal-roofed Apothecary in town.
- Pick 3 Silvercap (small, pale blue) and 1 Glowcap (small, purple). Picking is free.
- Hand them over for the Clearsight Tonic and 250 Gold.

Tip: the nearest patch is the bottom-right corner just inside Whisperwood (2 Silvercap, 2 Glowcap). Mushroom Hollow has the most Silvercaps. Patches regrow in 30 minutes, and Moonmere has plenty of Glowcaps.

6. Mirror Pond

0 energy, night only

- Wait until 9 PM game time.
- Follow the stream north from the middle bridge to Mirror Pond and use the tonic.
- Swim to the gap under the north-east bank, enter the grotto, go up and right, and search the wet ledge at the top-right: Mirror Charm.

Tip: during the day the pond only reflects the sky, and a daytime try does not use up the tonic. Spend the wait on crops or fishing.

7. The Forgotten Shrine

0 energy

- From the crossroads take the south path to the weeping-angel shrine.
- Place the token in the round hollow and the charm in the other: Map Piece I.
- Tell Maren for 400 Gold; she points you at Dunn in Stonepeak.

Tip: crop tasks 1-7 must be complete or chapter 8 will not open. Use your bed refill and start fishing hard; Gold and energy get tight from here.

Chapter Checklists

Act II: The Delvers (chapters 8-14)

Open every cave chest before spending anything: each one hands over the tool a later chapter needs.

8. The Miners' Camp

about 40-80 energy

- Take the east road past the Forge and Carpenter up into Stonepeak. Read the notice at the entrance, then head up the left edge to Dunn's fire and the second notice.
- Dunn wants his Lucky Pick, 20 Copper Ore and 25 Stone.
- Old Working (mine mouth east and slightly down from the camp): take the shaft down. On the lower level go along the top to the far right for the shift boss's chest: Bronze pickaxe, 6 Copper, 3 Quartz.
- Lucky Pick: lower level, straight down to the bottom-left corner, end of the side passage between two rocks.
- Mine 14 more copper (doubles first) plus 15 extra for Bram later. Top level: turn right on entering for 2 doubles and a single; 2 more doubles sit on the way to the shaft. Lower level: copper all around the start.
- Buy 25 Stone at the General Store (about 875 Gold) and bring Dunn everything for 800 Gold.

Tip: if only singles remain, wait 20 minutes for doubles or accept 6 energy per ore. You can also trade 4 Wood for 5 Stone at the Exchange. Your Bronze pickaxe has 1,000 uses.

9. Haskett's Strongbox

0 energy

- Ask Dunn about the mark on his pick.
- Collect four digits, one per spot (they are different for every player), then dial them into the strongbox beside Dunn's fire: Foreman's Record and 800 Gold.

Digit	Where	What to read
1st	The jetty on the small lake right of the camp	By the depth marks on the last plank
2nd	The cairn on the south ridge, down the left edge	Chalked on the top stone
3rd	Company board in the Ruined Compound, right and slightly up from the quarry pit	The number in "Shift __. Mine."
4th	Miners' graves, lower-left corner of the compound	Under the name TAM

Tip: three wrong tries jam the dial for 15 minutes, so write the numbers down first. If it jams, use the time mining copper.

10. The Green Vein

about 30 energy

- Enter the timbered tunnel in the top-left corner of Stonepeak, behind the camp. Go up, then right to the top-right corner and open the prospector's chest: Gold pickaxe and 2 Emeralds.
- Break 3 emerald seams (green-flecked rocks or crystals): one near the entrance, 2 doubles on the right wall, 2 singles beside the chest. Singles cost 10 energy and count the same as doubles.
- Take Haskett's Note from under the stone by the green pool, left of the chest. Reward 1,000 Gold.

Tip: "Needs a Gold pickaxe" means the chest is still unopened. It is a spot you stand on, not something to click: walk the back walls until the Open prompt appears. Emerald seams regrow in an hour.

11. The Lever Handle

about 60-90 energy

- Bring Bram (the Forge, north side of the east road) 3 Emeralds, 15 Copper, 15,000 Gold and Haskett's Note for the Lever Handle.

Tip: see the Gold Cheat Sheet. Sell spare loot first, then fish, then crops, and mine only if forced. Keep Bram's emeralds and copper out of every sale.

12. The Lever in the Dark

0 energy (+20 for rubies)

- Go up the gorge from the central quarry pit to the Gloom's gate.
- Floor 1: up, then right to the top-right corner and down the stairs.
- Floor 2: ruby sits just right of your arrival point. Cross to the bottom-right corner and take the stairs.
- Floor 3 (red deep): from the top middle, hug the right wall down to the middle of the room. The lever is behind a rock, with 3 ruby crystals beside it. Fit the handle: Rare sword.
- Mine 2 Rubies (10 energy each, Gold pickaxe) and open the chest at the bottom middle: Gold axe, 3 Amethyst.

Tip: a Bone Spider sits in the centre, so stay on the right wall. Spiders hit for 14-20 plus poison or burn. Eat a Hearty Stew (+44) or sleep in your bed for a full heal; if you drop to 0 you wake at home with 40 health.

13. The Last Cart

0 energy

- Quarry pit gantry: read the loading log (5 carts sent).
- Ruined Compound gate, held by the gargoyle: read the gate book (4 carts arrived).
- The missing cart is the number on the first list but not the second. The ruts in the gorge confirm it.
- Climb from the High Shelf to the Delvers' Court, read the plinth numbers on the 4 hooded statues, and search the one matching the missing cart: Delvers' Key and 1,500 Gold.

Tip: a wrong search locks the court for 30 minutes. Write both lists down before you go.

14. The Sunken Vault

about 12 energy

- Door is at the edge of the High Shelf, east of the court. Go straight up to the stairs down.
- In the treasury, open the strongbox in the centre: Amethyst rod, 4 Gold Ore, Diamond.
- Search the stone shelf at the bottom-right: Delvers' Record and Map Piece II. Reward: Amethyst pickaxe and Epic bow.
- Mine 1 Gold Ore (12 energy) from the double rocks just below your arrival point, left and right of the stairs.

Tip: the Vault Queen (280 health, hits for 30) is on the left and 2 Gilded Spiders are above the shelf. Hug the bottom wall going right, carry 3-4 Fried Fish and avoid the fight.

Chapter Checklists

Act III: The Lake Remembers (chapters 15-18)

Plant this act's crop tasks as soon as it opens: waiting is the only real cost here.

15. Two More Pieces

0 energy with a Golden Fish

- Show Maren the Delvers' Record (west bank, north of the bridge).
- Give Nixie (pond at the south-east of town, below the Market Hall) a Golden Fish for Map Piece III.
- At Moonmere go up the right side of the lake to the Old Cave in the north-east cliff (needs a Bronze pickaxe or better). Top-left dry corner: Map Piece IV. Top middle, across the stepping rocks: the drowned chest (Gold rod, 2 Moonstone, 4 Rose Quartz).
- Bring Maren all 4 pieces for the Founders' Map and 1,500 Gold.

Tip: expect 30-40 casts for the Golden Fish, in the town river or off your island, not Moonmere. Fry every common catch so the search funds itself.

16. The Founders' Map

about 0 energy, 5,000 Gold

- Hold the map and press Space to see your X. It is one of four spots on Moonmere.
- Stand there with the map in your hotbar or backpack and press E on Dig here to find a rusted chest.
- Bram sells you the Pry Bar for 5 Gold Ore and 5,000 Gold. Return, open the chest: Founders' Letter and Founders' Seal, plus 2,000 Gold.

Spot	Where (from the Moonmere entry)
1	Straight up to the middle of the map
2	Up the right shore of the lake, past halfway but short of the top
3	Up the right shore, nearly to the top-right corner
4	Driftwood Cove: from the left road go up and left, by the log, 2 steps down-left of the bottle

Tip: a wrong dig locks digging for 20 minutes. No shovel and no night are needed. If E does nothing, refresh the page. Gold short? Sell the Diamond (~2,300), the 3 Amethyst, and any Gold Ore beyond 5.

17. The Lake Remembers

0 energy

- Examine any 3 of the 5 old things, then find Marven on the teal shelf up the stairs in the north-west. Reward 2,000 Gold.

Landmark	Location
Message in a bottle	Driftwood Cove, a little up and left of the left road
Glowing stump	Keep going left from the bottle to the left edge
Tide Stone	Top-left corner, just above Marven's pool

Landmark	Location
Sunken boat	Out on the lake, up and left of centre
Houseboat	Right shore, a little below the middle

Tip: the quickest trio from the bottom-left entrance is bottle, stump, Tide Stone, with Marven right beside it.

18. Marven's Request

about 45 energy, plus Farming 10

- Hear Marven's list, then fetch the Moon Pearl from the Old Cave's far shallows (up from the entrance, bearing a little left, near the top). It appears only after she asks.
- Star Fruit grown by you (Farming 10, 5 hours).
- 2 Ghost Catfish: Moonmere lake after 9 PM, about 1 cast in 5. One is handed over, one goes in the stew.
- Cook Moonlight Stew at any stove: 1 Ghost Catfish + 1 Star Fruit + 2 Silvercap.
- 5 Wheat, 5 Cabbage and 5 Corn that you grew (15, 20 and 40 minutes).
- 2 Rubies from the Gloom, and the Founders' Seal.
- Reward: 250 Gold, 3 Saffron seeds, a place on the Founders' roll; early finishers also get the mint spot and 500 Shards.

Tip: the budget is about 45 energy plus 2 per crop. Chapter 18 costs no Gold, only seeds (Corn ~615, Cabbage ~120, Wheat ~95). Silvercaps grow beside Marven's pool and the glowing stump. Fish during your Ghost Catfish night, and sleep every time the bed is ready.

Gear and Chest Locator

Free tools beat shop tools

Each chest opens once per player. Four of them hold the tool the next stage needs, and the shop equivalents cost 2,500 to 120,000 Gold, so loot first and shop never.

Chest	Contents	Where
Shift boss's chest	Bronze pickaxe, 6 Copper, 3 Quartz	Old Working lower level, top-right corner
Topaz Drift tool box	Bronze axe, 3 Topaz	Stonepeak bottom-left mine; 2 spiders beside it
Prospector's chest	Gold pickaxe, 2 Emeralds	Green Vein, top-right corner
Red-deep chest	Gold axe, 3 Amethyst	The Gloom floor 3, bottom middle
Delvers' strongbox	Amethyst rod, 4 Gold Ore, Diamond	Sunken Vault treasury, centre
Chest under the roots	Bronze rod, 3 Sapphire	Glimmer Hollow cave, Whisperwood, top-left corner
Drowned chest	Gold rod, 2 Moonstone, 4 Rose Quartz	Old Cave, top middle (hop the rocks)

Pickaxes

Tier	Breaks	Durability	Free source	Shop price
Iron	Copper, Quartz, Rose Quartz, Stone	300	Starting tool	~2,500
Bronze	plus Topaz, Sapphire, Moonstone; opens the Old Cave	1,000	Ch 8 shift boss's chest	~5,000
Gold	plus Emerald, Amethyst, Ruby	4,000	Ch 10 prospector's chest	~35,000
Amethyst	plus Gold Ore, Diamond	10,000	Ch 14 reward	~120,000
